Stack n' Stack

Design Concepts:

- ◎Due to space limitation, children do not often have the chance to play with large-scale building blocks. Stack n' Stack is constructed from space- efficient flat pieces, making it easy for children to handle.
- ◎101 Building Block allows users to experience the transition from 2D to 3D -- constructing 3 dimensional blocks from flat pieces, and then arrange them into their ideal buildings.
- ◎101 Building Block can stimulate children's sense of sight, familiarize them with the idea of perspective, and give them different visual experiences.
- ◎Unlike the heavy wooden large-scale building blocks, 101 Building Block is made of light-weight materials, allowing children to play and create large-scale models easily and freely.

建築積木

設計理念：

- ◎都市環境的限制，孩子少有機會接觸大型積木的搭建，建築積木營造了孩子跟空間對話的機會，讓孩子能在建築與藝術空間中享受大型建構遊戲的趣味。
- ◎從零開始的建築，一片一片先組合成立體積木，每塊積木再搭蓋出自己夢想中的建築物。
- ◎在建構過程中培養自信心，讓孩子發現高大與美的建築神奇。
- ◎從孩子的視知覺出發，營造積木的空間穿透性，創造孩子不一樣的視覺感受。
- ◎建築積木創造了質輕及安全的積木搭建環境，讓孩子更能遨遊在建築創作的世界中。

Product Features:

- ◎Stack n' Stack is easy to assemble, space efficient, suitable for both family and school use.
- ◎3 dimensional objects such as cubes and cuboids (open or close) can be created using flat Stack n' Stack components. Those 3D objects can be arranged into different creations and used in games.
- ◎Closed 3 dimensional objects such as cubes and cuboids can be made with 6 flat Stack n' Stack components; open 3 dimensional objects can be made with 4 flat 101 pieces. Closed and open objects created by 101 components can be arranged into different creations and used in games, giving users different visual effects.
- ◎The appearance and materials of Stack n' Stack are different from other large-scale blocks on the market. Stack n' Stack offers more in terms of artistic aspects and spatial concepts.
- ◎Stack n' Stack is suitable for young children to use as building blocks and props in role play games.

- ◎造型與質材不同於一般的木質塊狀大形積木，創造了藝術造型的表現空間。
- ◎適合一般幼兒作大型積木搭建或角色扮演遊戲使用。
